1. **DEFINITIONS**

Permanent employee

An employee appointed for an unlimited period.

Temporary employee

An employee appointed for a limited period.

Average

The total of a set of values divided by the number of values in that particular group.

Weighted average

A procedure to combine averages of two or more groups each with different sizes. In other words, this average considers the proportional relevance of each component rather than treating each component equally.

Median

The median is the midpoint of a list of values. At least one half of the values in that particular list will not be higher than the median value.

Real and nominal values

The **nominal value** refers to any price or value expressed in money of the day, as opposed to **real value**, which adjusts for the effect of inflation.

2. EXECUTIVE SUMMARY

The Wage Survey, which is conducted every second year, is not compulsory for members of the Namibia Agricultural Union. It is therefore important to bear in mind that the respondents may vary with each survey.

2.1 Remuneration

The total remuneration package of employees on commercial farms contains two main parts. One is the monetary remuneration part and the other is employee benefits. Both these parts are made up of several components as reflected in the report.

The total remuneration package of permanent employees on commercial farms in Namibia for 2019/2020 amounts to N\$ 3 660.03 per month or N\$ 18.77 per hour. This figure comprises of the following and should be read in conjunction with tables 14 and 15:

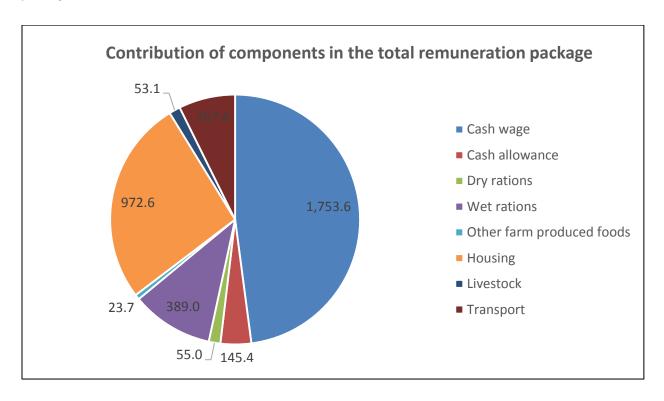

Detail	2014	2016	2018	2020
- Weighted monetary remuneration	1 896.35	1 975.12	2 138.17	2 366.71
- Weighted value of free housing	884.49	1 000.13	957.44	972.63
- Weighted value of employee livestock	91.91	51.00	52.96	53.09
- Free transport for children of employees to schools and sick persons to medical facilities	168.65	294.39	264.94	267.60
Total remuneration cost per employee	3 041.39	3 320.64	3 413.51	3 660.03
Percentage increase compared to previous survey	8%	9%	3%	7%

Although 89.55% of employers in this survey pay annual bonuses to their employees, these expenses are not included in the above remuneration figures. Items such as firewood, electricity, water, SSC and pension fund contributions are also not included in the above figures, though these are benefits for the employee and further costs to the employer.

The total monetary remuneration (basic salary) of employees has increased since 2014 as follows:

- 4.2% between 2014 2016,
- 8.3% between 2016 2018
- 10.7% between 2018 2020

The average value of the various components that each contributes towards the *TOTAL remuneration* package, are illustrated as follows in the chart below:

The various components within the *MONETARY remuneration* as well as the percentage that each contributes towards the monetary remuneration basket, are illustrated as follows:

-	Cash wage	74 %
-	Food allowance	6%
-	Dry rations	2%
-	Wet rations	17%
-	Other farm produced food	1%

2.2 Electricity

A total of 60.58% of employee households in this survey have access to electricity in their homes and 25.07% employee households have access to solar power. These figures decreased slightly compared to the 2018 wage survey where 69.91% of households had access to electricity and 25.87% had access to solar power.

2.3 Dependants

The weighted average dependants per employee in this survey are 2.09. This figure decreased slightly compared to 2.31 dependants per employee in the 2018 wage survey.

2.4 Annual bonuses and salary increases

A total of 89.55% employers indicated that their employees received annual bonuses and 80.43% employers indicated that their employees received annual salary increases.

2.5 Employee Health

HIV/AIDS

A total of 19.90% employers indicated that they were aware of HIV/AIDS cases amongst their work force against 27.3% in 2018. 98.33% of these respondents indicated that these employees were receiving treatment.

Tuberculosis

A total of 12.11% of respondents are aware of TB cases amongst their employees against 11.8% in 2018. 98.63% of these respondents indicated that these employees were receiving treatment.

General health screening

A total of 37.65% employers indicated that their employees underwent general health screening during the past twelve months.

2.6 Alcohol and substance abuse

36.82% employers reported cases of alcohol and substance abuse that occurred amongst their employees within the reporting period.

2.7 Accidents

10.7% of employers reported a total of 102 injuries on duty.

2.8 Workers' unions

Only 379 of the 4 382 permanent employees in this survey are members of a registered workers' union which brings the union representation of farm workers to 8.65%.

2.9 Land sizes

The average land size of respondents that farming activities are conducted on, is 9 911 hectares. These sizes vary from 26 hectares to 50 000 hectares per participating employer. The land sizes represent farming activities on the farmer's own land as well as leased property.

3. INTRODUCTION

A wage survey was conducted in 2020 to investigate and analyse the different components of the remuneration packages and management of farm workers in the commercial agricultural sector. This report is the result of data that was collected and analysed. The purpose of this report is to provide sound and reliable statistical information regarding labour in the commercial agricultural sector, which in turn can be used by decision makers such as the Agricultural Employers' Association Management as well as individual agricultural employers and other agricultural role-players including the Government.

4. METHODOLOGY

All principal members of the Namibia Agricultural Union received by direct mail or e-mail, a questionnaire with the request that this be completed and returned by 30 June 2020. Members were requested to provide information for the 2019/2020 financial period. Data was analysed at national as well as regional levels.

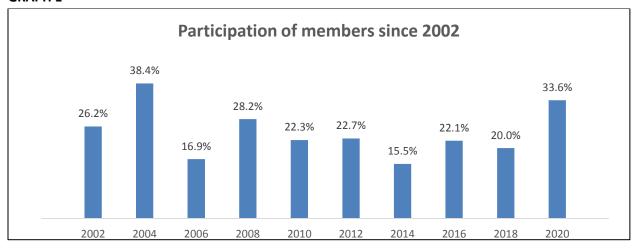

5. PARTICIPATION

5.1 National participation:

A total of 1 793 questionnaires were sent to principal members of the Namibia Agricultural Union. A total of 603 members (respondents) returned completed forms thus resulting in a 33.6% participation rate.

Participation of respondents in the AEA wage surveys since 2002 is illustrated in graph 1 below:

GRAPH 1

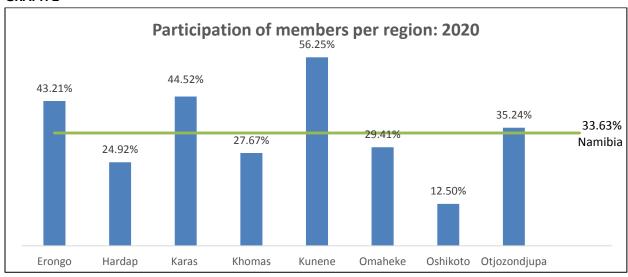

5.2 Participation per region:

Participation by principal members in each region is illustrated in table 1 and graph 2 below:

TABLE 1

	Number of respondents	%
Erongo	35	43.21%
Hardap	83	24.92%
Karas	126	44.52%
Khomas	83	27.67%
Kunene	45	56.25%
Omaheke	80	29.41%
Oshikoto	3	12.50%
Otjozondjupa	148	35.24%

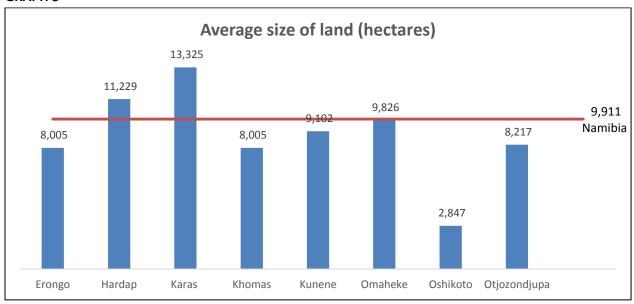

GRAPH 2

6. LAND SIZES ON WHICH FARMING ACTIVITIES ARE CONDUCTED

The graph below sets out the average land sizes of the respondents in Namibia and the respective regions. It should be noted that these farming operations represent farming activities on the farmer's own land as well as leased property.

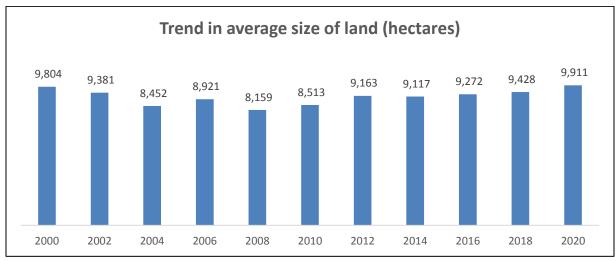

GRAPH 3

The average land size of all participants is 9 911 hectares, including leased land. The median is however only 8 000 hectares. The individual size of land on which farming activities are conducted in this survey varied from 26 hectares to 50 000 hectares.

Graph 4 shows the trend in land sizes farmed on by respondents since 2000:

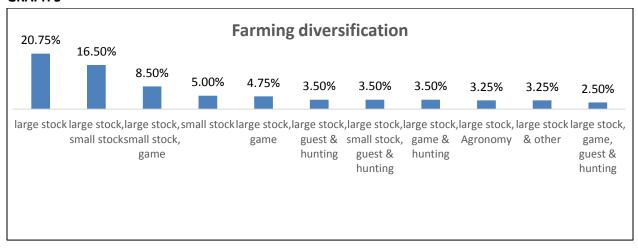

GRAPH 4

7. FARMING COMBINATIONS

Graph 5 shows the eleven largest farming activities and the diversification thereof. These activities represent 75% of all farming activities in this survey.

GRAPH 5

8. EMPLOYEES IN THE SERVICE OF RESPONDENTS

8.1 Number of employees:

The wage survey represents data of 5 340 employees. This data is divided into the following categories:

TABLE 2		APPOINTMENT	
		Permanent	Temporary
Female Male		903	116
GEN	Male	3479	817

^{*}The gender and/or appointment data of 25 employees are missing

Table 3 shows the number of all employees per region per gender qualification:

TABLE 3

Number of employees per region per gender classification						
Regions	Male	Female				
Erongo	180	69				
Hardap	436	89				
Karas	680	234				
Khomas	486	124				
Kunene	332	89				
Omaheke	801	136				
Oshikoto	44	11				
Otjozondjupa	1349	270				

^{*}The gender data of 10 employees are missing

8.2 Number of employees per employer:

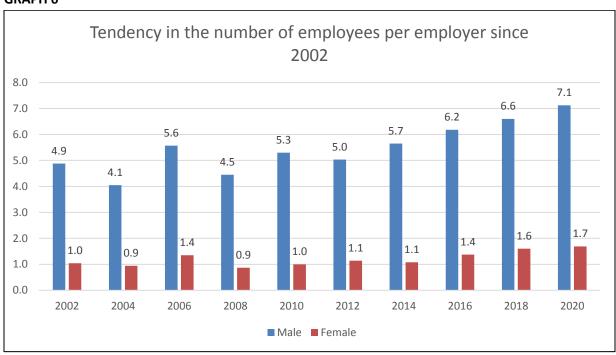

Table 4 represents the average number of employees per employer in the various regions. On average, there are a total of 8.82 employees per employer on commercial farms in Namibia (8.10 in 2018).

TABLE 4

Average number of employees per employer per region						
Regions	Male	Female				
Erongo	5.14	1.97				
Hardap	5.22	1.07				
Karas	5.37	1.85				
Khomas	5.86	1.49				
Kunene	7.38	1.98				
Omaheke	9.96	1.68				
Oshikoto	14.67	3.67				
Otjozondjupa	9.10	1.82				
National	7.12	1.69				

Graph 6 illustrates the trend in the number of employees per employer since 2002:

GRAPH 6

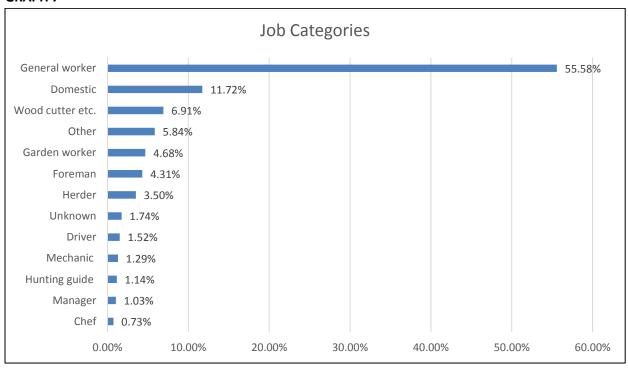

8.3. Job categories:

8.3.1 Percentage employees in different job categories:

Graph 7 shows the percentage of the different job categories of employees on farms:

GRAPH 7

[&]quot;General Worker" is by far the biggest job category for employees on farms in Namibia.

8.3.2 Average hourly cash wage of employees within different job categories in 2019/20:

Table 5 shows the average normal working hours, hourly cash wage and monthly cash wage of permanent employees within different job categories:

TABLE 5

Job categories	Permanent employees	Average normal hours/ week	Average cash wage/ hour	Average cash wage/ month
Manager	54	45.00	66.74	13,013.30
Foreman	227	44.34	15.39	2,956.81
General worker	2605	44.49	9.16	1,765.82
Herder	167	43.20	8.41	1,574.23
Gardener	237	43.18	9.60	1,796.15
Driver	79	44.91	14.12	2,747.68

Domestic worker	6.15	5.20	6.47	12.83	7.30	18.36	8.64	11.34	9.62

8.4 Termination of service

A total of 714 farm workers left their place of work within the survey period according to the respondents. This figure represents 13.37% of all employees in the survey in comparison with 11.71% in the 2018 Wage Survey. Graph 8 differentiates between the reasons for these terminations.

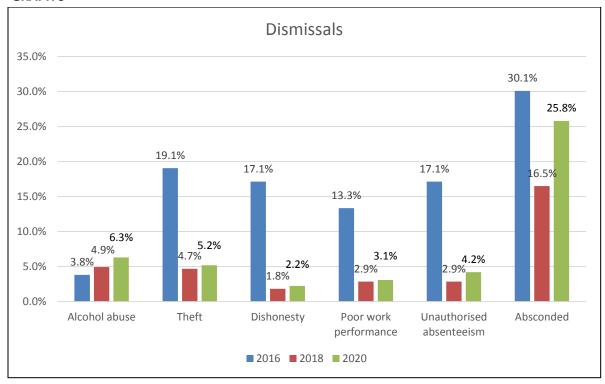

GRAPH 8

Most of the terminations of jobs are employee-driven and mainly consist of resignations and workplace desertion. 46.78% of all job terminations during the 2019/2020 financial year were due to dismissals. Only 28 (3.92%) of the employees whose services were terminated, were retrenched despite the devastating drought encountered during most of the reporting period.

Graph 9 distinguishes between the different reasons for dismissals as well as the percentage employees concerned in comparison with the 2016 and 2018 statistics.

GRAPH 9

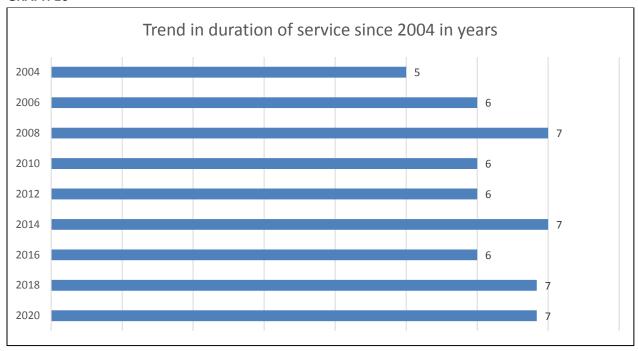

8.5 Service period:

The average employment period of permanent employees in Namibia is 6.67 years. Table 7 shows the average employment period of permanent employees in the various regions.

TABLE 7		Permanent employees			
		Number of employees			
	Erongo	239	7.35

	National	1659	9622	5.80	4387	2.19

The weighted average number of sick leave days taken by permanent employees during the survey year is shown in graph 11:

GRAPH 11

The weighted average number of sick leave days per permanent worker amounts to 2.19 days.

9. REMUNERATION

The monetary remuneration package of employees in the commercial agricultural sector consists of various components and combinations thereof:

- A cash wage; and
- one (or a combination) of the following components:
 - cash allowance;
 - farm produced foods (in kind);
 - rations bought from a shop and given by the employer to the employee in kind;
 - keeping livestock and/or cultivating land.

9.1 Basic cash wage and working hours:

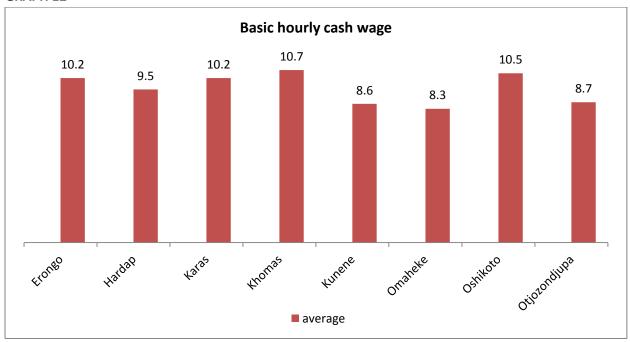

Table 9 shows the basic average cash remuneration and working hours of permanent agricultural employees in this survey. Remuneration and hours worked, reflected as averages, can however be skewed by very high or very low values and to remove this skewing, a median value was also included in the table.

TABLE 9

Category	Average	Median
Normal hours worked per week	43.5	45
Cash wage per hour	N\$ 9.31	N\$ 7.34
Cash wage per month	N\$ 1 754	N\$ 1 431

Graph 12 shows the average basic cash wage per hour for permanent employees in the regions:

GRAPH 12

The average cash wage per hour is the highest in the Khomas region N\$ 10.71, as expected.

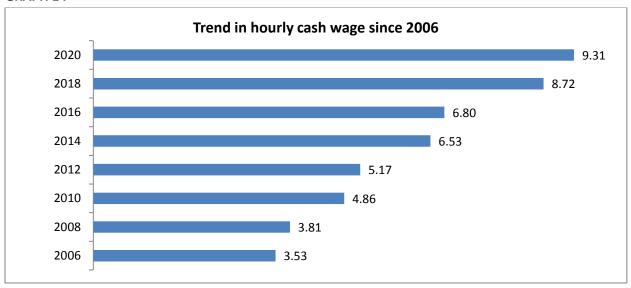

Graph 13 shows the average cash wage **per month** of permanent employees in the regions:

GRAPH 13

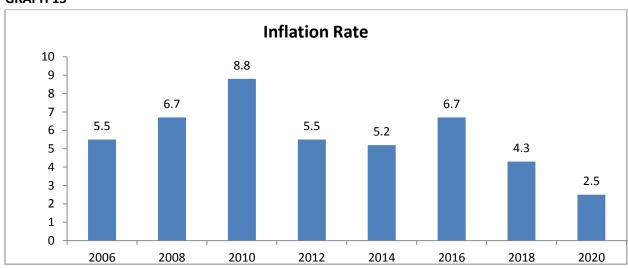

Graph 14 illustrates the trend in the hourly cash wages of permanent employees since 2006:

GRAPH 14

Graph 15 shows the annual inflation rate since 2006 (Source: Namibia Statistics Agency).

GRAPH 15

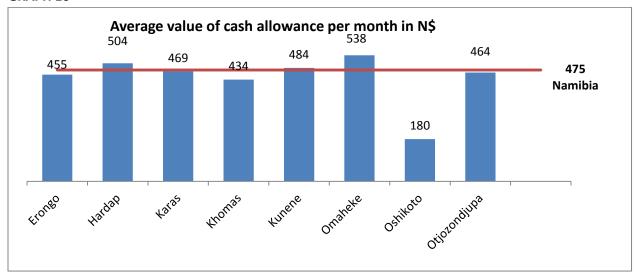

The current entry-level minimum wage of N\$ 4.62 per hour came into force on 01 November 2017. The actual average hourly wage of farm workers according to this survey is N\$ 9.31 per hour which is 101.52% more than the current minimum wage.

9.2 Cash allowance, rations and keeping animals:

9.2.1 Cash allowance:

30.59% of permanent employees receive a cash allowance (2018 survey – 23.02%) with an average value of N\$ 475.29. Graph 16 shows the average value (not weighted) of cash allowances for permanent workers in the regions.

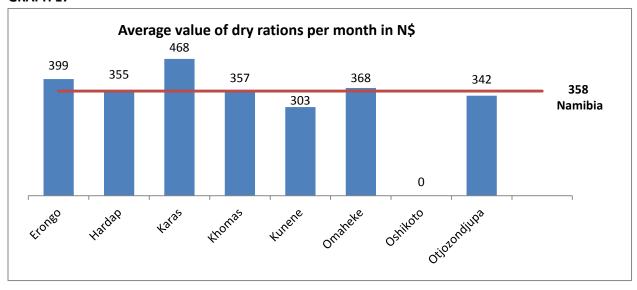

GRAPH 16

9.2.2 Dry rations (Bought from shops and given to employees free of charge):

15.36% of permanent employees represented in this survey receive free rations which employers buy from shops (2018 – 12.84%) with an average monthly value of N\$ 358.45. These rations include, amongst others, maize meal, sugar, coffee, tea, fish etc. Graph 17 shows the weighted average value of above-mentioned rations for permanent employees in the regions:

GRAPH 17

9.2.3 Farm produced foods:

Farm produced foods in this survey refer generally to meat and milk.

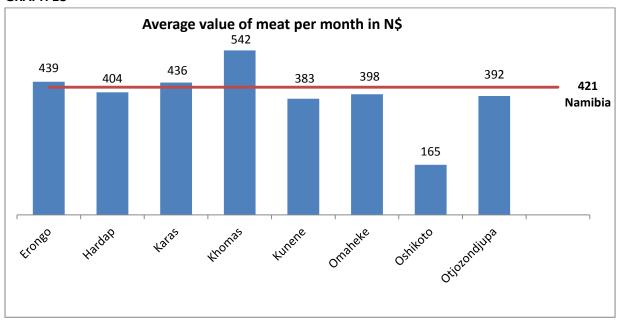

A conservative value of N\$ 28.25/kg (based on the 2020 average producer prices of mutton, beef and game) was used to determine the value of meat that employees receive as part of their remuneration packages.

The provision of beef is still in the minority whereas mutton is more popular, especially to the south of the country. Most employees however receive venison.

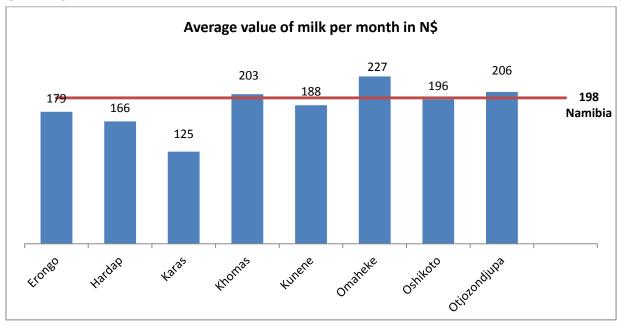

The price used to determine the value of milk that employees receive is N\$ 6.14/lt. (source: NamDairies). A unit price of N\$ 5.82/lt. was used in the 2018 survey.

73.63% of permanent employees in this survey receive meat with an average value of N\$ 420.88 per month and 39.99% permanent employees receive milk with an average value of N\$ 197.78 per month as part of their remuneration packages. 20.81% permanent employees receive other farm produced foods to the value of N\$ 113.90 per month. These foods presumably include maize meal, vegetables and fruits. Graphs 18, 19 and 20 respectively indicate the average values of meat and milk that farm workers receive in this survey as well as other farm produced foods.

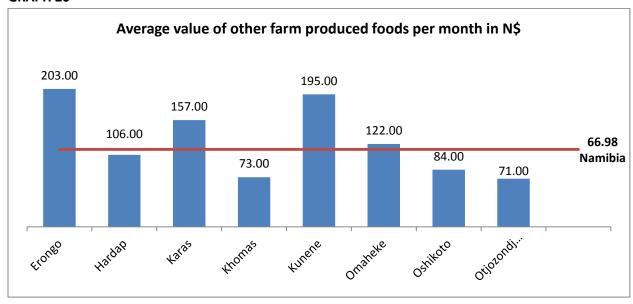

GRAPH 18

GRAPH 19

GRAPH 20

9.2.4 Keeping livestock:

The formula that was used to calculate the cost of employees' livestock is set out in table 10. A conservative value was used in the Wage Survey and includes only the cost of water and grazing. In many cases employers also cover the cost of management, lick and animal health costs for employee livestock.

TABLE 10

	N\$/Large stock/Month	Formula of large stock	N\$/animal/month
Cattle	80	1.1	88.00
Small stock	80	0.15	12.00
Other	80	0.93	74.40

Table 11 differentiates between the percentage permanent employees who keep large stock, small stock and other animals such as donkeys, mules & horses.

TABLE 11

% permanent employees		Large stock	Small stock	Other

	National	446.46	219.50	255.71	

Graph 21 shows the average weighted value of cash allowances, rations, and the livestock of employees in the different regions:

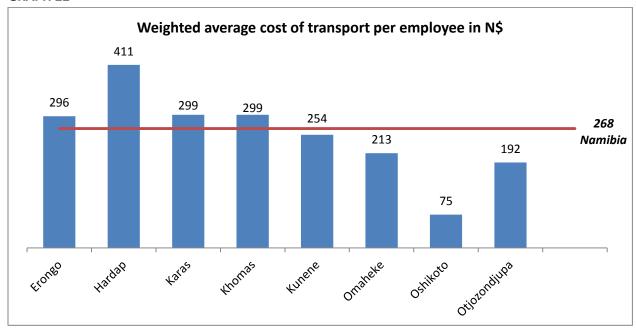

GRAPH 21

9.3 Free transport:

The total cost per employee to transfer school children to town for free, and the free transportation of the employees and their dependants to medical facilities in Namibia and the various regions are shown in the following graph. The cost of transportation is calculated at a tariff of N\$ 5.25 per kilometre. (Source: AA tariff).

GRAPH 22

65.17% of respondents in this survey (2018 - 62.25%) indicated that they provide free transport for school-going children of employees to and from schools and hostels. 95.02% of the employers in this survey indicated that they provide free transport for employees to clinics and hospitals (2018 - 88.50%).

9.4 Housing:

9.4.1 Housing types

Respondents of the 2020 Wage Survey indicated that there are 4 106 employee houses on the land where they conduct their farming activities. This brings the average number of houses to 6.12 per employer. The average size of these houses is 42.91m² with an average of 2.5 rooms per house. These figures do not include wash- and toilet facilities. 82.12% of the above-mentioned houses are built with bricks. The 2018 figure for brick houses was 86.23%.

9.4.2 Wash and toilet facilities

44.74% of the above-mentioned employees' houses have own wash and toilet facilities, whilst there are also shared ablution blocks available for the rest.

9.4.3 Cost of housing:

The average cost of housing is calculated as follows:

• The average valuation price of a typical farm worker's house with shower, toilet and covered veranda is approximately N\$ 3 400 per square meter. (This figure is based on information that was obtained from a local valuator);

- The average value of houses is determined by multiplying the valuation per square meter with the average total square meters of employee houses;
- The annual rental value is calculated at 8% of the total value of a house;

Table 13 reflects the value of housing per employee.

TABLE 13

	Average m²	Cost per m²	Value per house	8% of value	Value per employee per month
Erongo	41.26	3 400.00	140 284	11 223	935.23
Hardap	40.69	3 400.00	138 346	11 068	922.31
Karas	42.35	3 400.00	143 990	11 519	959.93
Khomas	46.34	3 400.00	157 556	12 604	1 050.37
Kunene	44.06	3 400.00	149 804	11 984	998.69

Otjozondjupa	43.24	3 400.00	147 016	11 761	980.11
National	42.91	3 400.00	145 894	11 672	972.63

9.4.4 Cost of electricity supply:

A total of 60.58% employee households in this survey are provided with electricity at their homes which is mainly supplied through Nampower, Erongo Red and Cenored. 25.01% of households have access to solar power. A total of 11.77% of the above-mentioned employers recover a part of the costs from the employees to the average value of N\$ 71.40 per month per employee.

A total of 88.16% employee households in this survey also use firewood on a daily base at no cost. The average value of this additional benefit of farm employees is estimated at N\$ 450 per month per employee.

9.5 Total monthly remuneration packages:

All employees do not receive the same benefits as part of their total remuneration packages and therefore it is necessary to use a weighted average principle to ensure that the analysis is not skewed.

The total remuneration packages of employees who are represented in this survey are summarized in tables 14 and 15.

TABLE 14 – Monthly monetary remuneration

	Cash wage	Cash allowance	Dry rations	Wet rations	Other farm produce	Total equivalent monetary remuneration
Erongo	1 863.71	190.93	59.95	332.41	43.23	2 490.23

National	2 366.71	972.63	53.09	267.60	3 660.03

It must be noted that the calculated total remuneration package per month does not include bonuses, clothing, medicine, school- and hostel fees, pension and social security contributions as well as water and energy (wood/ electricity) costs. These mentioned items are a cost to employers and form part of the employees' benefits.

Graph 23 shows the percentage to which the different components contribute within the *total* remuneration package of employees in this survey.

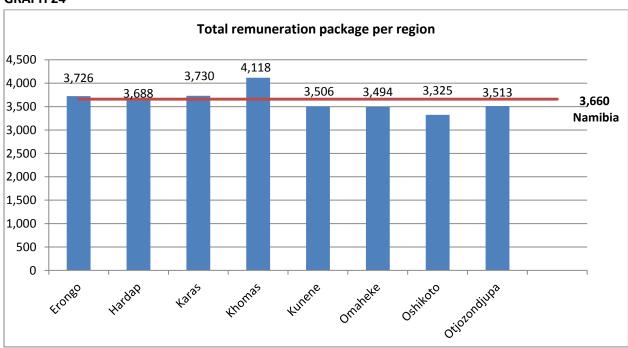

GRAPH 23

The total remuneration package of employees represented in this survey amounts to N\$ 3 660.03 per month (2018 - N\$ 3 413.51).

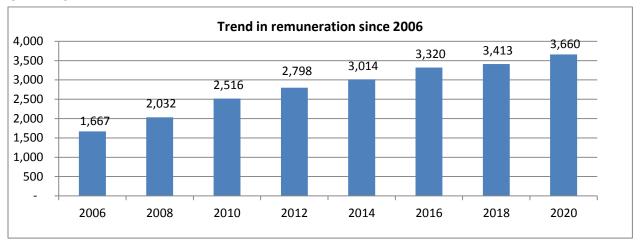

Graph 24 makes a comparison between the value of the total monthly remuneration package of employees in Namibia and the various regions.

GRAPH 24

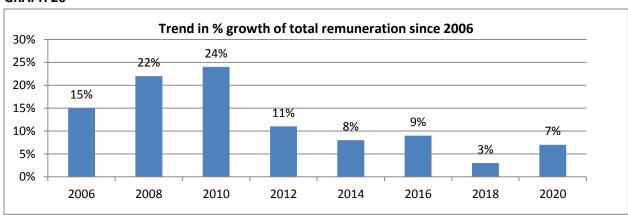

Graph 25 shows the values of the total monthly remuneration packages of employees since 2006:

GRAPH 25

Graph 26 illustrates the nominal growth in the value of total remuneration packages of permanent employees since 2006:

GRAPH 26

The change in the trend of the monetary remuneration component within the total remuneration package since 2000 is expressed in table 16 below as follows:

TABLE 16

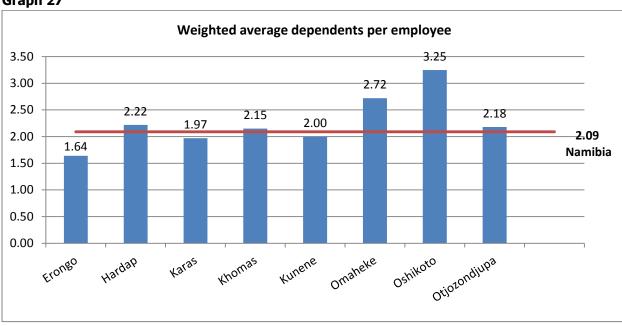

Year	Cash	Rations	Total
2002	37%	25%	63%
2004	41%	22%	63%
2006	39%	21%	60%
2008	34%	19%	53%
2010	35%	16%	51%
2012	34%	18%	52%
2014	41%	21%	62%
2016	39%	16%	55%
2018	44%	18%	62%
2020	48%	17%	65%

From the above table it can be seen that for 2020 the monetary component of employees' remuneration comprises 65%, whilst the non-monetary component of employees' remuneration, such as housing, transport and employee livestock, comprises 35% of an employee's total remuneration package.

10. DEPENDANTS OF PERMANENT EMPLOYEES

A total of 57.11% of all permanent employees in this survey have their dependents living on farms with them (2018 – 64.93%). Dependents are categorized as spouses, toddlers, children of school-going age and other dependents such as pensioners and disabled persons.

Graph 27 shows the weighted average dependents per permanent employee on farms where these workers are employed. The national figure is 2.09 dependents per permanent employee. In 2018 this figure was 2.31.

Graph 27

11. BONUSES

89.55% of employers provide bonuses to their employees. Employers indicated that the following principles were used to determine cash bonuses:

60.37% - 13th cheques

48.70% - Merit-based

22.22% - Based on financial success of the business

12. SALARY INCREASE

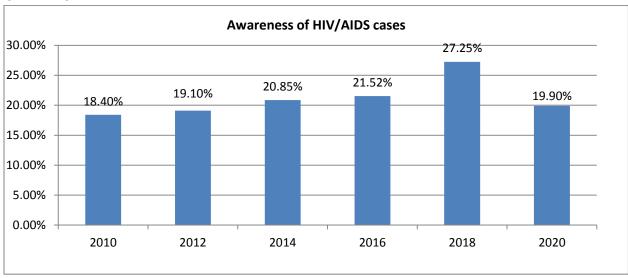

80.43% of employers in this survey indicated that their employees receive annual salary increases with an average increase of 9.66%.

13. EMPLOYEE HEALTH AND SAFETY

HIV/AIDS

19.90% employers in this survey indicated that they are aware of HIV/AIDS cases amongst their workforce and their dependents. Of these, 98.33% employers specified that the relevant persons received counselling and treatment. HIV/AIDS awareness dropped significantly from 2018 as can be seen on graph 29 indicating awareness during the past 10 years.

Tuberculosis

12.11% employers are aware of TB cases amongst their workforce and their dependents. 99% of these employers indicated that the relevant employees or dependents are receiving treatment.

Health screening

37.65% of employers indicated that their employees received health screening over the reporting period.

• Injuries on duty

10.8% of employers reported a total of 102 injuries on duty during the period under review. Of these injuries 45 were treated on the farm and 57 were treated at a hospital. Expenses of only 28 of these injuries were claimed from the Employee Compensation Fund.

14. UNIONS

Employers indicated that only 378 of the 4 031 permanent employees in this survey are members of a registered workers' union which brings the union representation of farm workers to 9.38%. 250 employees of one big horticulture farmer from the Ariamsvlei Farmers Association represent 66% of the Union representation.

15. ALCOHOL AND SUBSTANCE ABUSE

36.82% employers reported cases of alcohol and substance abuse that occurred amongst their employees within the reporting period.

16. PENSIONERS

According to this survey, 84 pensioners/disabled persons live on farms in separate households and are supported by the owners through various ways. The financial support that owners/ex-employers give these pensioners range from cash allowances to wet & dry rations and the keeping of livestock. They also receive support in terms of housing and transport as well as water and electricity/wood supply.
